Are you serious?!By CustomerWhales, dolphins, etc. FISH ?? No, seriously ?!

When children look at fish in a nature book, they will see that there are beautiful colors and shapes of the various fish that live in oceans and lakes. They can use their imagination to create their own fish to put in a different habitat or one that eats other types of food than fish normally eat. Children can make aquariums at home with real fish that they get at a pet store so that they can see how they live in a habitat with water.
