**Stephen H. Putman : Integrated Urban Models Volume 2: New Research and Applications of Optimization and Dynamics (Routledge Revivals)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Integrated Urban Models Volume 2: New Research and Applications of Optimization and Dynamics (Routledge Revivals):

Following on from Integrated Models Volume 1: Policy Analysis of Transportation and Lane Use (Routledge Library Editions, 2006), this book bridges the gap between the scholars and the practitioners of transportation and land-use modelling. First published in 1991, chapters discuss model-calibration and model-solution problems, describe a series of numerical and policy analyses, and propose potential directions for location and land-use research. This reissue will be of particular value to undergraduate and postgraduate geography students with an interest in integrated urban

modelling; in particular, the research conducted in the field over the past two decades.
