Interior design is a multidiscipline profession blending spatial, technical and aesthetic knowledge. The skill involved in manipulating these elements to solve specific design problems is intrinsically linked to drawing. Interior Design Drawing explores all aspects of this vital design skill, from sketching to record information, through orthographics and development to analyse the problem, to presentation drawing to communicate the solution.Explore the role of drawing in the design process; understand the main orthographic drawings; use line, tone and colour across 2D and 3D drawings; add texture and atmosphere to drawings; consider aspects of composition and presentation of a set of drawings; an overview of how drawing relates to the process of interior design. This guide covers sketching to record

information, elevation and projection, and making final presentation drawings to communicate solutions to clients. Fully illustrated with over 100 colour illustrations. Alan Hughes has an MA in Interior Architecture and has taught at undergraduate and post-graduate levels for many institutions.

About the Author Alan Hughes has done design work for museums, commercial structures, and landscapes and is currently an instructor in the field.
