Hal Leonard Corporation : Your First Fake Book before purchasing it in order to gauge whether or not it would be worth my time, and all praised Your First Fake Book:

5 of 5 people found the following review helpful. Great book for first year students - from a piano/guitar teacher
By Dennis A. Jankowski
This is a wonderful book for students with some limited knowledge of their instrument. I use it to teach both guitar and piano students. It should be noted the songs do not show the bass clef for piano students, so they will need to know how to compose chords based upon the chord name. Likewise, the book assumes the reader knows how to form chords if they are attempting to play on the guitar. Since all the songs are in the key of C Major, they tend to have a similar progression of chords giving them a similar sound. I teach students from 8 years old to 35 years old and each one has been able to find some songs in the book that they want to learn.

I am thrilled to have this book. I am just re-starting piano lessons after a hiatus of 45 years. I'm almost ready to start playing from this book, and

my teacher says I'll be ready to thoroughly investigate it soon. She says it's great to have and she's teaching me some theory, so that book will really test out these lessons. This isn't an actual review, but I can tell with the proper background in notes and theory, it will be a fantastic opportunity to play anything!!0 of 0 people found the following review helpful. And the selection of songs is more than I thought and I like most of themBy MarciI'm just recently started to teach myself to play a keyboard and already can work myself through some of the songs. And the selection of songs is more than I thought and I like most of them.
